Re: The Dangers of Microchipping Animals & the [insert the Name of the Proposed or Existing Legislation here.](#)

Please be advised that research shows there are serious health risks and other problems associated with microchipping animals. These problems include but are not limited to: cancer, neurological damage and death.

Concerns about microchipping are outlined in the attached document. Please publish and/or report on the attached information to inform your readers and/or listening audience about the dangers of microchipping animals.

This information has also been sent to the government with a request to remove all clauses in the legislation that pertain to mandatory microchipping of animals.

Thank you.

Sincerely,

Your name
